Senior Software Developer

With 5 years of experience in software engineering, I have expertise in Microsoft technology stack, Azure cloud migration, and Agile Methodology. I have spearheaded the development and modernization of critical applications within the energy sector, optimizing operational processes and ensuring high availability. My skills include C#, .NET Core, Azure services, and product development.

WORK EXPERIENCE

Accenture

12/2024 - 04/2026

Sr. Software Engineer • Full-time

Hyderabad, HYD

- **Legacy Modernization :** Spearheaded the end-to-end modernization of the apps, converting legacy **VB.NET** to **C# / .NET Core**, achieving a **4x performance improvement** while optimizing **React** front-end components and integrating new APIs to support updated business logic.
- **AI-Driven Development:** Leveraged **GitHub Copilot** (validated by **GH-300 certification**) to accelerate code migration, refactoring, and unit testing, significantly reducing development cycle time for complex legacy transformations.
- **Cloud Architecture & API Migration:** Re-architected monolithic on-premise APIs into scalable **Azure Cloud APIs**, integrating **Azure Key Vault** for zero-trust secrets management and eliminating hard-coded credentials.
- **DevSecOps & Security:** Orchestrated secure CI/CD pipelines in **Azure DevOps**, implementing **GitHub Advanced Security (GHAS)** and **SAST** scans to ensure 100% vulnerability-free deployments.
- **Identity & Observability:** Modernized security and monitoring by implementing **Azure Entra ID** for granular RBAC and **Azure Application Insights** for real-time distributed tracing, reducing Mean Time to Resolution (MTTR).

Mirae Asset (VersionNext)

02/2024 - 09/2024

Software Engineer

Mumbai, MH

- Actively involved in creating software using the most up-to-date Microsoft technology stack, including C#, .NET Framework, .NET Core 6, 7, 8, .Net MVC, SQL, MYSQL, Web API, RESTAPI, and JavaScript.
- Engaged in product development utilizing Agile Methodology within the Microsoft technology stack.
- Collaborated with leaders committed to implementing best product development practices.
- Participated in projects within the diverse Trading business domain.

Businessnext

04/2021 - 01/2024

Software Engineer

Bangaluru, KA

- Actively involved in creating software using the most up-to-date Microsoft technology stack, including C#, .NET Framework, .NET Core, SQL Server, Web API, and React.
- Engaged in product development utilizing Agile Methodology within the Microsoft technology stack.
- Collaborated with leaders committed to implementing best product development practices.
- Participated in projects within the diverse BFSI business domain.

Knowledge Lens

05/2019 - 06/2019

Intern

- Worked on iLens device and different M2M communication channels (MODBUS, APIs, HTTP, rs232, rs485 etc)

EDUCATION

Electronics Engineering in Engineering

Kalinga Institute of Industrial

Bhubaneswar, Orissa

Science in Computer Science

PROJECTS

mStock

02/2024 - Present

Mirae Asset

Created and maintained the mStock trading platform, a robust and scalable solution for financial trading. Developed database-driven web applications using ASP.NET MVC, C#, and object-oriented programming (OOPS). Leveraged SQL Server for efficient data management and Angular for a dynamic, responsive front-end. Integrated Redis for high-performance caching, ensuring the platform could handle large volumes of real-time trading data. Collaborated closely with cross-functional teams to enhance the platform's functionality, security, and user experience, contributing to its success in the competitive trading market.

Asset Based Journey (HDFC BANK)

04/2021 - 01/2024

Businessnext

Developed and implemented asset-based journeys including credit card, auto loan, home loan, and business loan journeys for HDFC Bank. Utilized ASP.NET MVC, C#, and object-oriented programming (OOPS) to create robust, database-driven web applications. Leveraged ASP.NET Core and SQL Server for efficient data management for seamless communication between applications. Enhanced the user interface using ReactJs, ES6, and NodeJs, ensuring a responsive and dynamic user experience.

Voice Controlled Home Automation System

This is a system where you need to say some simple commands like lights on to make the lights of a room ON, fans, TV.

Transmitting and Receiving data from cloud

It is an IoT based project comprising of two modules (FRDM-KL25z's) where module 1 transmits sensor data to an IoT based cloud and the other module receives the data from cloud.

Air mouse

Created an air mouse which works on accelerometer and gyroscopic module and FRDM-KL25z board.

Door security system

It is an Arduino based project using a simple servo motor and a HC05 Bluetooth module.

SKILLS

Agile Methodology, BFSI, Clean architecture, Communication, Customer Relations, Database Proficiency, Multitasking, Problem- solving, Process Flows

Azure Services: App Insights, azure Entra, Azure KeyVaults, azure pipelines

Vibe Coding: Angular, Brazor Pages, C#, JavaScript, mySQL, Python, SQL, TypeScript

.Net: . Net Architecture, . Net Core, . Net Framework, . Net MVC, . Net Webapi
